

From:

Office of Piotr bin Izhk  
Izhkstan Prime Minister for Root Vegetable Distribution  
Peaceful and Democratic Landlocked People's Republic of Izhkstan

To: Decadent Outsourcing Programmer

Greeting! As part of President Petr's openness and transparency initiative, we want you to build two web page for fair and orderly cyber distribution of root vegetable.

Main idea is each citizen go to 'front page', they enter their 6-digit IZ number, and they 'bid' Izhk for each root vegetable they want.

Each citizen is equally distributed 100 Izhk, used only for bidding. One citizen can make more than one bid, or change bid if they change mind. But if one citizen bid more Izhk than 100 total across all vegetable, or bid is incorrect for any other good reason, front page should say "VERBOTEN" (German is good language for error message) and ignore bid.

All possible root vegetable for bidding are:

- Potato
- Onion
- Turnip
- Imported Turnip

Code you build should make changing root vegetable easily, like if imported turnip truck accidentally has garlic.

The one 'back page' shows bid for all vegetable by all citizen, but is only for Prime Minister of Root Vegetable Distribution to see, so it need password protection. Password will be fantasy foreign word, "beet" (an imaginary vegetable made of blood and dirt). Prime Minister is easily distracted, so back page should be organized by vegetable first, then sorted by bid, highest bid first. Prime Minister need to see all bid to ensure absolute fairness and brotherhood in root vegetable distribution.

Once you build them, please respond to this message with URL address of both front page and back page. Be sure to use Correcht Englizh in both page. Prime Minister would like to announce front page at Winter Harvhest Fezhtival, so please respond by midnight on Thursday, April 19.

Warmest regards, Piotr.

World Factbook Entry for Izhkstan:

Legal Name: Peaceful and Democratic Landlocked People's Republic of Izhkstan (PDLPRI)

Common Name: Where?

Pronunciation: The H is widely regarded as silent, giving "izz-ik-stan".
